ABOUT ME

Computer Science student with foundational knowledge in web development (JavaScript, React) and Python. I am familiar with IT support principles, possessing practical experience in basic troubleshooting, networking concepts, and customer service through training. I am highly motivated by problem-solving and dedicated to continuously advancing my skills.

WORK EXPERIENCE

05/2025 – 09/2025
Romania

Junior Full-Stack Web Developer
TWH România
- Contributed to the development and maintenance of web applications utilizing HTML, CSS, and PHP
- Implemented responsive front-end layouts and user interfaces in collaboration with senior team members.
- Ensured cross-browser and cross-device consistency by performing rigorous debugging and testing.
- Took part in team meetings, sprint planning, and code reviews to improve skills and understand full project lifecycles.

EDUCATION AND TRAINING

10/2023 – Current
Sibiu, Romania

Computer Science
Lucian Blaga University of Sibiu
- Studied core programming concepts using C++ and Python, with focus on algorithms and software development. Gained hands-on experience in databases (SQL, relational modeling) and web development, building simple full-stack applications.
